ENHANCEMENTS & FIXES

Merchant Management

- When clicking the vertical ellipsis (⋮) within a merchant snapshot, you can now view, add and delete operators associated with that merchant.

Virtual Terminal

- A merchant now has the ability to permanently delete a card on file, where previously you would only be able to remove it from a specific transaction.
- Additional data from Virtual Terminal Transactions such as phone, email, invoice # & product description are now displayed in the transaction snapshot.

Device Management

- When editing the parameters on a device you can create a threshold to require a password for issuing refunds. (ex. Any refund over \$100 requires password)
- When editing the parameters on a device you can enable or disable the Cash option on the terminal
- When editing the parameters on a device you can change the allowable tip % (0%- 500%)
- When editing the parameters on a device you can choose whether or not you want tax to be included in the non cash charge
- When editing the parameters on a device you can now either decline an AVS mismatch or be notified that mismatches occurred and choose whether to allow or decline the transaction.

Terminal

- Previously transactions could only be split equally among multiple customers, the new update allows the bill to be split anyway the customers decide.
- When a Pin Pad is connected, the Merchant has the ability to do manual card entry on the Host Terminal or the Pin Pad

Portal

- By clicking the Version number in the portal you will be able to review Valor updates as they are released
