VL100 v1.2.84 VL110 v1.3.22 VL500 v2.0.8 Android Mobile App v2.0.41 Portal App version v2.1.67

Release Notes

#### C O N T E N T S

- P 03 Introduction of Menu & Inventory Management (VL500)
- P 04 Introduction of Dual pricing (VL500)
- P 05 Introduction of Valor Connect
- P 06 Enhanced Tip Controls
- P 07 Force On Screen Signature
- P 08 Transaction Logs Added to Transactions Module
- P 09 Signature Debit Only
- P 10 Show Remove Card
- P 11 Virtual Terminal Enhancements
- P 12 Two-Factor Authentication For Valor Portal
- P 13 Serial Number Lookup
- P 14 Valor Connect
- P 15 Bin Based Surcharge (VL500)
- P 15 New Idle Screen for Dual Pricing (VL500)

Introduces Comprehensive & Advanced

# Menu & Inventory

Management

#### Unified Platform to List, Organize & Track Your Items

- Line Items
- Real-Time Inventory Tracking
- Cloud Integration
- Split Payment
- Early Alert on Stock-outs

## Dual Pricing Nov Avaiable on our VL500 (Android)

- Clearly displays the Cash Vs Card pricing at the time of sale
- No post-transaction increases (i.e. Non-cash adjustments, Non-Cash Charges)
- Clearly indicates discounts on receipts

## Bringing You A Simplified & Innovative Solution

# VALOR CONNECT

Instant cloud integration is just one click away

#### **Enhanced Tip Controls**

#### **1. Control TIP ON RECEIPT**

We have added a new toggle to the **TIP**, **TAX & FEE** section allowing the users to determine whether or not the Tip line appears on the printed receipt.

#### 2. Control TIP ON SCREEN

Name Change: Please be advised that we have renamed **PAY @ TABLE** to **TIP ON SCREEN** 

Using these controls Our partners can set Merchants' Tips to:

**Tip On Screen** at time of sale ONLY (Online Only) **Tip On Receipt** post sale ONLY (Offline Only)

### Transaction Logs Added to Transactions Module

The following details are Included within the Transactions Module

1.Fee Removed Identifier
 2.Original Security: Online Pin
 3.Performed Security: Default

We have added an identifier per transaction, to quickly identify if the merchant manually removed the Custom Fee on a transaction.

Fig 3: Displays the change in transaction dropdown menu.

Figure 3

Figure 4

#### Signature Debit only

We have added a toggle for **SIGNATURE DEBIT ONLY** within the **TIP**, **TAX & FEE** section. When **ENABLE FOR DEBIT** and **SIGNATURE DEBIT ONLY** are enabled, the fee will only be charged on Signature Debit transactions. By default, when only **ENABLE FOR DEBIT** is enabled, the fee will be charged on all debit transactions.

**SIGNATURE DEBIT ONLY** will be DISABLED by default for newly created EPIs/ devices.

### Two-Factor Authentication For Valor Portal

For enhanced security, we have implemented the **Two Factor Authentication** functionality in our portal. To activate the feature, go to the **User Management** module and select the vertical ellipsis and select **Enable 2FA**. When it is enabled, the OTP (One Time Password) is sent to the user's email address and phone number, which is available on file for the account. If the user does not receive the OTP, there is an option to have it resent to the email address and phone number on file.

Also, for added security, if the contact information on any account is changed, we will send an email and SMS message to the contact information we have on file.

### Serial Number Lookup

We have added a section to look into the history of EPIs loaded onto a serial number. This feature can be accessed through the **DEVICE MANAGEMENT** module within the **ACTION** button.

#### **Valor Connect**

**Valor Connect** allows merchants to connect our terminals to either their Valor Virtual Terminal or their POS system. With our Cloud APIs, we allow merchants to use our terminals as an extension of their POS system.

We have added a toggle for Valor Connect within the **TERMINAL & TRANSACTION** section. When enabled, the terminal will go into Receiving Mode, where it will wait for the merchant to initiate a transaction from their Virtual Terminal or POS system and push the card acceptance for the transaction to the physical terminal.

Figure 11

## **Bin Based Surcharge (VL500)**

We have added **Dual Pricing** and **Bin Based Surcharge** to the VL500. When **Bin Based Surcharge** is enabled, the merchant will enter the transaction amount and tap the **OK** icon. The customer's card is inserted, and the card is processed appropriately.
