Inspire Innovation through Valor's SDKs

Valor PayTech's SDKs are meticulously designed to simplify development. They allow developers to customize point-of-sale (POS) operations for businesses. With these comprehensive toolkits, developers can seamlessly integrate and enhance user experiences across VL500 and RCKT devices.

Get the most out of Valor SDKs

Easily accessible API collections & documentation

Valor's SDKs offer developer-friendly API collections with easy access to a range of tools and tutorials for effective integration. This empowers partners with the flexibility to craft applications and UI interfaces tailored to their specific needs. It's a developer's paradise, an all-in-one solution that sparks creativity and efficiency.

Effortless financial transactions with custom branding

Simplify financial transactions with Valor's POS devices, enabling users to establish their unique brand, develop custom applications, and shape marketing strategies seamlessly. Leverage our secure and certified environment and visual editors for visually appealing graphical elements, integral to mobile app development.

Tailored environment for secure payments

Navigate the intricacies of payment transactions effortlessly with Valor SDKs. Our tailored environment ensures personalized solutions for quick and secure payment processing, enabling users to sidestep complexities and accelerate their financial operations effectively.

Streamlined card transactions with Valor SDKs

Valor SDKs streamline card transactions by communicating effectively with our certified servers, sparing users from exhausting processes. Utilize our comprehensive API ecosystem with certified devices and environment to skip the hard road and empower your financial operations effectively.
